

# Dye Printed Ties

## How to place an Order

1. Send a logo, a colour scheme and if possible a design brief. You will then receive a selection of designs for approval.
2. From approval of the artwork, a pre-production sample is made to show the actual colours, detail achieved, and print quality. This will take 2/3 weeks.
3. On approval of the printed sample, your goods will be dispatched in 3-4 weeks by courier on a next working day service.

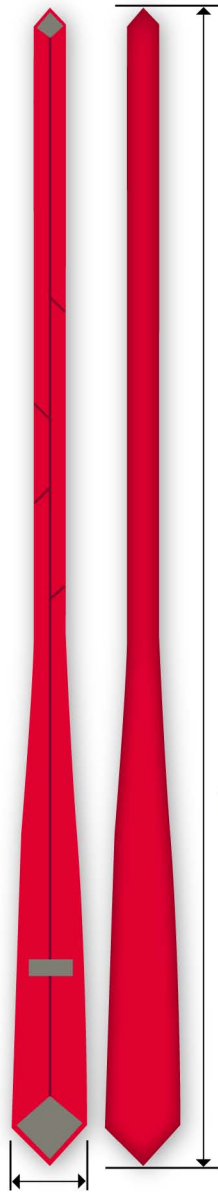

## Design information

For printed ties, there are very few design constraints. We suggest using silk fabrics if your design needs very fine levels of detail, especially in small areas.

## Care Instructions

All of our ties are supplied with a dry clean only label.

## Available in Polyester and 100% Silk.

9.5cm x 142cm

## Specification and Options

**Fabric-** We use a twill fabric as standard, as this produces the best results in terms of clarity and handle of the tie. We can however offer a choice of other fabrics.

**Colours-** Any non-metallic colour can be reproduced by matching to a pantone shade, a swatch of fabric or artwork. Printing is particularly suitable if you require vibrant colours. There is no restriction on the number of colours in a design, although a high number of colours will increase the costs.

## Optional Extras

**Labels-** Bespoke woven label on the reverse of the tie. Fabric self loop is standard.

**Tie wallet-** Either plain black or bespoke with printing.

**Tie boxes-** Plain black or bespoke, options include cube or flat box, fabric covered lids which can be hinged. With or without cufflinks. (See options sheet).

**Tipping-** The lining material which is visible on the reverse at each end of the tie. An extra cost option is to weave your logo or company name in a shadow effect.
